Creative and detail-oriented front-end web developer with a strong foundation in HTML, CSS, and JavaScript. Experienced in transforming user interface designs into responsive, interactive web pages. Proficient in collaborating with teams to develop seamless and user-friendly websites.

Work Experience

Front-End Web Developer (Contract)   *May 2024 - Present*
Arab Center for Research and Policy Studies

- Redesigned web pages based on provided UI/UX designs, delivered as PSD or image files.
- Created responsive HTML files for each web page using HTML, CSS, and JavaScript.
- Collaborated remotely with the organization's web development team to ensure accurate implementation of redesigned pages.
- Provided ongoing support and made necessary corrections, clarifications, and updates to facilitate smooth integration into the existing website.

National Youth Service Corps (NYSC)   *Oct 2023 - Oct 2024*
Mountain Top University, ICT Department

- Served as a corps member in the ICT department, contributing to various technology and support projects.
- Assisted in maintaining and updating the university's IT infrastructure.
- Provided technical support and troubleshooting for staff and students.
- Collaborated with the social media manager to establish a social media presence for the university's Open Distance Learning (ODL) program on Facebook and X (Twitter), including the development and management of targeted ads to attract potential students.

Freelance Web Developer (Remote)   *Oct 2022 - Nov 2023*
Al-Araby Al-Jadeed

- Developed custom web tools, including a Featured Image Maker, for generating thumbnails for social media sharing.
- Cloned the Arabic website, alaraby.co.uk, onto Blogspot to create a Spanish adaptation, alaraby.es.
- Collaborated remotely with the social media manager to ensure accurate implementation and alignment with the project's goals.
- Provided ongoing support and adjustments to meet the specific needs of the client.
